

# Lecture#14: Production Data for Buzurkan Oil Field

Dr. Dheiaa Alfarge

# What are you going to do in the next report?

- Plot Pressure Versus time for each well
- Plot the average pressure versus time for the field
- Plot the production rate versus time for each well
- Plot the total field production rate versus time
- Plot the cumulative production for the entire field versus time
- Plot the average field pressure versus total field production rate
- Estimate the OOIP for the field by using the correct material balance equation. You might need to use some data from the previous reports.
