Education / Qualifications

- **MRCS Ed**, Royal College of Surgeons of Edinburgh, UK March 2019
- **FACMS Fellow Arab Council for Medical specializations training program** (Trauma and Orthopedic surgery) Oct 2011- Apr 2017
- **MBChB**, Al-Nahrain Medical College, Baghdad, Iraq, oct 2002 – Jun 2008

Other Relevant Work Experience / Information

Career Highlights

- Through my journey in Trauma & Orthopaedics, I was exposed to a genuine and excellent experience which related to this field of medicine
 - Airway management
 - Extensive experience with elective and trauma orthopedic surgeries
 - Professional level of Hemiarthroplasty, NOF and spine trauma surgeries.
 - Demonstrated ability in handling a wide range of instruments and equipment's including all instruments used in complicated orthopaedics surgeries.
- Skilled interpretation of different types of imaging.
- Academic activity: the department has a strong and active teaching, commitment (journal clubs, case presentation, grand rounds, multidisciplinary meetings, CME activities)
- Supervision as well as educating the rotating residents and the junior fellows.
- Different conferences and workshops (certificates of attendance will be submitted upon request)
- My future plan is to go forward into FRCS exams.

Courses and Workshops:

- AO trauma course Basic principles of fracture management in August 2018
- AO trauma course advanced principles of fracture management in August 2018
- Spinal Fixation Workshop in March 2019
- Clubfoot treatment using Ponseti method course in July 2016 by Red Cross Association
- AO spine principle course in February 2016
- Hands on cadaveric workshop in primary hip and knee arthroplasty in July 2016
- Upper limb approaches (cadaveric course) Glasgow University October 2020
- Have attended Istanbul arthroplasty cadaveric courses of advanced hip and knee arthroplasty in 2021 and 2022
- Have attended the Swiss pelvic course in Zurich Switzerland in 20-21 January 2023

Research:

- Serum Procalcitonin level in musculoskeletal infections in 2017
- In the process of publication of my paper about the percutaneous release of trigger finger

Audits and Quality improvement projects

- I am proud that I have introduced some of the recent fracture management techniques and procedures to the orthopedic department of my previous hospital in Iraq (Nasiriya), those are the following
 1. Closed reduction percutaneous pinning of supracondylar humerus fracture in pediatric age instead of the old open reduction method.
 2. Use of MIPO techniques in treating comminuted fracture of long bones
 3. Closed locked Intramedullary nail fixation of tibia and femur shaft fixation instead of the old open reduction and plate fixation.
 4. PFN use to treat peritrochanteric fractures.
 5. Pelvic ring and acetabulum fractures fixation techniques
 6. TENS nailing of pediatric long bones fractures

Teaching experience

- I was working for the college of medicine in the College of Medicine\ThiQar University all the years after my graduation from medical school till I travelled to UK in December 2019.
 - at first I was involved in giving anatomy lecture and practical anatomy lab sessions , then after I finished my orthopedic training , I started teaching trauma and orthopedic surgery to the undergraduate medical students (both in theory lectures and practical hospital based sessions).
 - Currently doing the teaching process for the under graduate in AlAyen College of Medicine \ Anatomy department
- Apart from that I was always happy to teach the junior colleagues during my training years in trauma and orthopedic surgeries.

Leadership and Team working

Leadership Experience:

Many of my supervisors saw the leadership instinct in me; therefore, they always charged me to lead the team and depend on me in many things far more than my colleagues.

Team Working:

- I can work well both as a part of a team and independently, depending on what the situations calls for. During my internship and the following years of service, I would arrive early in the morning; I use to ensure that the list for ward round is ready on time with all the investigation results of the patients. Although it is clearly defined role and often required to use my own initiative; by fulfilling that I functioned as team player as well. Indeed, I needed to anticipate what information my colleagues may need when making management decisions; I also needed to liaise with other departments or patients' relatives when information was missing, which requires good communication and, sometimes, diplomacy.
- I have been always good at discussing problems with my colleagues so that

can all improve and the team can provide a better service. I am more concerned about presenting the problem that concerns us all rather than placing the blame on some individuals, by which we can work towards resolving the issue as a team.
